

FOR IMMEDIATE RELEASE

Dan Malmstrom Named President of Douglas Scientific

Alexandria, MN, February 1, 2010 – Douglas Scientific, provider of patented Array Tape™ for high throughput screening in bioscience laboratories, announced today the appointment of Dan Malmstrom as its President and Chief Operating Officer.

“Dan consulted with us to establish the strategic underpinnings for the next phase of Douglas Scientific growth,” said Vern Anderson, Chairman of Douglas Machine, the parent company of Douglas Scientific. “Dan’s track record as an operating executive is impressive, and we are thrilled to have him join us to guide an optimistic agenda.”

Douglas Scientific provides automation for scientific laboratories that conduct high throughput screening applications. Guided by the engineering heritage of its parent company, Douglas Scientific designed laboratory instrumentation – Nexar™ and Araya™ – that perform liquid handling and detection in a thin, continuous Array Tape™ media with nano-level embossed wells. The design of the Array Tape™ and modular inline platform maintains the flexibility of microplate-based technology while virtually eliminating manual handling and complex robotics. The technology allows scientists to complete laboratory screening at profound throughput rates and fractional costs.

Malmstrom brings a rich entrepreneurial background to Douglas Scientific. After a stellar sales career at IBM, Dan spent 12 years as a senior executive at Great Plains Software during its growth era, eventually completing a successful IPO and sale to Microsoft. Subsequently, Malmstrom has founded several high-tech companies, including BeAtHome – an internet home automation company – that received international acclaim at the Consumer Electronics Association and was subsequently acquired by Echelon Corporation.

About Douglas Scientific

Douglas Scientific provides high throughput screening automation that is optimized for liquid handling and detection in continuous Array Tape™. Douglas Scientific is a wholly owned company of Douglas Machine Inc, with corporate offices located at 3600 Minnesota Street, Alexandria, MN 56308.
