

FOR IMMEDIATE RELEASE

Douglas Scientific Announces Partnership with CyBio and Integration of the Dispensing Technology into the Array Tape Platform

Alexandria, MN, June 30, 2011 – Douglas Scientific LLC, announces a collaboration with CyBio Inc.

Douglas Scientific announced today they have signed an agreement with CyBio Inc, and have successfully integrated the CyBio Light Pipetting Head into their Nexar fluid handling system. The Nexar® is a modular, fluid handling system designed to process Array Tape, a novel microplate replacement that is transforming uHT screening.

“Our clients continuously drive for lower reaction volumes and increased speed. At the same time, they require the high quality fluid handling,” said Darren Cook, Douglas Scientific’s Director of Business Development. “Integration of the CyBio parallel channel pipettor delivers on all three customer demands while offering the flexibility to support ever changing laboratory processes. CyBio has an outstanding reputation for quality and reliability. We are excited to transfer those benefits to our clients.”

“CyBio is pleased with the collaboration and integration of their technology into the Array Tape platform,” says Ian Hanegraff CyBio Inc. General Manager. “The integration will offer Douglas Scientific customers best in class dispensing technology for their applications and processes.”

The Array Tape Platform is a highly automated, flexible microplate replacement that virtually eliminates manual handling and complex robotics. The unique combination of Array Tape, Nexar (liquid handler), Soellex™ (thermal cycler) and Araya® (scanner) provides continuous reel-to-reel processing, quality data, flexibility, cost savings, higher throughput, and a green solution.

About Douglas Scientific

Douglas Scientific is dedicated to making our world a better place by delivering innovative laboratory automation. Douglas Scientific is a wholly owned company of Douglas Machine Inc., with corporate offices located at 3600 Minnesota Street, Alexandria, MN 56308.

About CyBio

CyBio is an experienced manufacturer of high quality liquid handling technologies. The products of CyBio enjoy the highest reputation for precision, reliability and simplicity. Since 2009 CyBio is part of the Life Science Division of the Analytik Jena Group. *Analytik Jena is a leading manufacturers of analytical and*

bioanalytical systems for industrial and scientific applications and represented in more than 100 countries.
