

FOR IMMEDIATE RELEASE

Douglas Scientific Moves to New High-Tech Facility

Alexandria, MN, November 15, 2009 – Douglas Scientific, a company of Douglas Machine Inc. and provider of Array Tape™ for high throughput screening in bioscience laboratories, announces that it has moved into its new high tech manufacturing and lab sciences facility.

Douglas Scientific has experienced rapid market adoption of its revolutionary Nexar™ and Araya™ platform for high throughput laboratory screening, prompting the Douglas Machine Inc board of directors to make several significant investments to prepare for global scale, including a state-of-art facility.

The new 40,000 square foot facility is adjacent to the Douglas Machine Inc campus, and incorporates many new amenities to support a bioscience market leader. The two-story facility utilizes many green engineering practices, while incorporating manufacturing and Array Tape™ production work areas optimized for work flow and quality assurance processes.

Additionally, the new facility is equipped with two new laboratories, one to be used for instrument usability testing, and the second designed for scientific and laboratory process validation.

Dan Malmstrom, President and COO of Douglas Scientific remarked, “Our business is about translating possibilities into outcomes for our clients. We are thrilled to have facilities that support our mission so nicely.”

About Douglas Scientific

Douglas Scientific provides high throughput screening automation that is optimized for liquid handling and detection in continuous Array Tape™. Douglas Scientific is a wholly owned company of Douglas Machine Inc., with corporate offices located at 3600 Minnesota Street, Alexandria, MN 56308.
