

Patterson Joins Douglas Scientific Team

FOR IMMEDIATE RELEASE

Alexandria, MN, April 24 2012 – Douglas Scientific, a provider of Array Tape™ for high throughput applications in bioscience laboratories, announced the hiring of Joel Patterson as IT Specialist. In his new role, Patterson will coordinate the installation, testing, operation, troubleshooting and maintenance of hardware and software systems to support Douglas Scientific's growth.

Patterson brings over a decade of technical and management experience, most recently with C.H. Robinson Worldwide where he maintained, tracked and supported over 500 company servers. Prior to that, Patterson worked in IT support with Otter Tail Corporation, as well as Best Buy Corp.

“With information technology constantly changing, we must stay up-to-date on emerging technologies,” said Craig Mclain, VP of Business Operations. “Joel will play a key role in determining the potential effectiveness of IT advancements in our current system.”

Patterson earned two BS degrees from Minnesota State University Moorhead in Technical Management and Graphic Communications. He also received an AA degree in Information Systems from Northwest Technical College in Wadena, Minnesota.

About Douglas Scientific

Douglas Scientific is dedicated to making our world a better place by delivering innovative laboratory automation. Array Tape is engineered to be a ubiquitous media for high throughput processing, driving more data at lower costs. The high throughput Nexar® (liquid handling system), Soellex™ (thermal cycler) and Araya® (scanner) are optimized for Array Tape and virtually eliminate manual handling and complex robotics required for microplate-based systems.
